

CUSTOMER SATISFACTION ANALYSIS DASHBOARD

Olist Brazilian E-Commerce Marketplace

Dashboard Report

Note: All the visuals must be created on the olist_clean.csv dataset. All visuals must have a heading.

Chart 1 — On-time vs Late Satisfaction [Vertical Bar Chart - 1 Mark]

INSERT YOUR CHART HERE

Insights [1 Mark]: WRITE YOUR TEXT HERE

- On-time orders have much higher satisfaction (~83%) compared with late orders (~35%).
- Late delivery is strongly associated with lower customer satisfaction.
- This indicates that improving delivery timeliness should be a key priority for increasing customer satisfaction.
- The large gap between on-time and late orders suggests that delivery delays can significantly affect the customer experience.

Chart 2 — Satisfaction by State [Map - 1 Mark]

Chart 3 — Monthly Satisfaction Trend [Line Chart - 1 Mark]

INSERT YOUR CHART HERE

**Insights [1 Mark]:** WRITE YOUR TEXT HERE

- Satisfaction remained relatively high and stable, generally around 75–83% across most months.
- There were noticeable dips in late 2017 and early 2018, with satisfaction falling to around 70–75%.

- Satisfaction recovered strongly from mid-2018, reaching above 80% in the final months shown.
- Overall, the trend shows short-term fluctuations rather than a sustained decline in customer satisfaction.

Chart 4 — Lowest-Satisfaction Categories [Horizontal Bar Chart - 1 Mark]

INSERT YOUR CHART HERE

Lowest-Satisfaction Categories

Insights [1 Mark]: WRITE YOUR TEXT HERE

- Security and services has the lowest satisfaction rate, at roughly 50%.
- Portateis_cozinha and office furniture also have relatively low satisfaction, at approximately 54% and 64% respectively.
- Fashion_female, home comfort, and audio-related categories show satisfaction rates around 68–71%.

- The chart highlights that satisfaction varies substantially by product category, with some categories performing considerably below the overall satisfaction level.
- These low-performing categories can be prioritised for further investigation, particularly around delivery performance, seller quality, and product/service issues.
